

# NGUYEN DUUY MANH

## MECHANICAL ENGINEER

### OBJECTIVE

Mechanical Engineer with over 5 years of experience in design, assembly, product development and process automation looking for a mechanical engineer position related to design, simulation, optimization of process automation to drive design innovation and increase operational efficiency.

### EDUCATION

 **MAJOR: MECHANICAL ENGINEERING** // 8/ 2014 - 8/2019

**Ha noi University of Science and Technology**

Major: Mechanical and Manufacturing Engineering

### WORK EXPERIENCE

 **MECHANICAL DESIGNER** // 9/2018 - 2/2019

**ROBOCON 2019 BK STAR Group**

- Directly participating in layout design and construction of the Robocon field.
- Design the lifting system, push system, supporting frame structure for the robot.

 **TECHNICAL STAFF** // 7/ 2019 - 4/2020

**SHIOGAI SEIKI VIETNAM CO., LTD**

- Participating in the design and assembly of the "Correction Tape Pen production line" for Plus company
- Design, make 2D drawings, quote and assemble spring winding machines, Semi-automatic Chamfering Machine

 **PRODUCTION MACHINE ENGINEER** // 9/2020 - 12/2021

**TERUMO VIETNAM CO., LTD**

- Participating in the improvement and manufacture of a solvent supply system to separate the mold for the ( RFC end processing machine).
- Participating in the process of transferring machine technology from Japan related to Radifocus Glidacath products.
- Research manufacture jigs, installation jigs to support equipment as well as worker's manipulation to increase productivity.

 **CAD/CAE ENGINEER** // 3/2022 - Now

**FPT SOFTWARE COMPANY LIMITED**

- Recreate CAD data, create pre-CAE data: create meshes, attach connections, materials and render force,... using ANSA software.
- Use VCollab, Animator,... to measure forces, simulate, reproduce deformation, collect data and analysis to evaluate results.
- Automate the data collection and processing process using Python, VBA (excel) Create your own tools works on ANSA software to optimize tasks using Python.
- Data CRUD tasks on the customer's internal website: timesheets, management meeting schedule, web scraping,... using Node.js, Express.js, MongoDB, python.
- Create the company's internal web interface using the framework: Ant Design, JS, html, css.

### PROFILE

 nguyenduymanh241196@gmail.com

 0942627196 / 0559412132

 [https://manhnguyen241196.github.io/my\\_portfolio/](https://manhnguyen241196.github.io/my_portfolio/)

 Hai Boi, Dong Anh, Ha noi, Viet Nam

### SKILLS

#### OFFICE

- Able to use tools like Word, Excel, Power Point.
- Automate tasks using VBA

#### FOREIGN LANGUAGE

- EnglishScore certificate: CEFR B1
- Good ability to read, understand and translate technical documents in English. Communicate English is at a good level

#### MECHANICAL ENGINEERING

- Good skills in using 3D design software such as NX, SolidWork, AutoCad,...
- Able to use Festo Fluidsim compressed air simulation software as well as components to support pneumatic system design calculations
- CAE preprocessing tool: ANSA.
- Software for simulation and analysis of CAE results: VCollab
- Read, understand and edit drawings and technical documents
- Design, assemble machinery systems

#### PROCESS AUTOMATION

- Python, Javascript, VBA (excel,powerpoint), HTML, CSS.
- Framework: Node.js, Express.js.
- Database: MongoDB, MySQL Workbenches,...
